Task 14

الموضوع

What's Seaborn? python visualization based on Matplotlib, it provide a high level interface for drawing attractive statistical graphics.

scatterplot ::

histplot 

barplot 

boxplot 

jointplot =>

pairplot =>

Heatplot

Clustering

fav for eye

you can load old good data.

made more than one plots

a huge number of plots

it can make ~~not~~ Matplotlib lib

but it easier to use

Kde => the line for histogram 

hue => diff color beyond of data

size => the size on plots

palette => more like style colors
